Dishwashers using more energy cost more to operate. This model's estimated yearly operating cost is:

\$31

when used with an electric water heater

\$23

when used with a natural gas water heater

Based on four washloads a week and a 2003 U.S. Government national average cost of 8.41¢ per kWh for electricity and 81.6¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.
